

Rack Supported Warehouses

Indore, Madhya Pradesh
India

We are the leading rack supported warehouse manufacturing companies in india undertaking turnkey projects from inception to implmentation of contruction of asrs rack supported warehouses. The most advanced development of storage systems is in the field of Rack Supported Warehouses, in which the storage system is the building itself. Over the years we have designed Rack Supported Warehouses for the various industries for optimum storage solution as per the custom need. These rack supported warehouses carry the product but also support the roofs and sides of the warehouses fabricated structure. These rack structures use maximum percent (upto 80%) of the cube utilization to provide maximum floor space for storage solutions an attain a high storage density. Rack Supported Warehouses offer the highest possible storage density along with the lowest high rise storage construction costs when compared with structural steel frame buildings. These warehouses are designed and construction for use with counterbalanced electric forklifts or DC drive stacker cranes for ASRS warehouses.

Benefits of self-support and rack-supported warehouses

- Can be fully automated for all operation activity in ASRS warehouses
- Flexible for custom specification for any warehousing requirements

- Higher load capacities with use of double racking
- Short construction periods
- Low maintenance cost with high productivity
