Interactive White Board: Interactive whiteboard is a robust digital interactive board suited to education environment with fantastic capabilities made for Teachers, Pupils, Educators and Trainers in mind. When connected to a computer and a data projector, the interactive whiteboard becomes a large interactive learning tool allow to embed ICT across the whole curriculum. Lessons will become entertaining and interactive and students will become engaged and concentration spans will increase. Simply touch the Interactive whiteboard with the a pen and run all computer functions, such as opening files, running digital video clips, or downloading free content from the Internet from the front of the class so there is no need to return to your computer and lose the students' attention.

Visualizer: is a powerful new visual presentation, teaching and training tool. Ideally used with Interactive Whiteboards, Projectors or even portable banners, it makes learning, dynamic and interesting. It is the perfect solution for all training and presentation situations, classroom teaching and lesson recordings. It's powerful zoom allows you to view text documents and 3D objects in the minutes detail, Saving time and money with the image and video capture facilities. It's light weight and compact design features 2 side arm LED's which foldaway, while the camera arm fold forward neatly. It also features a positive / negative function, split screen, back light, auto focus and 330 degree turning head.

Class Screen: The Classscreen is an interactive panel which uses technology to combine an LCD monitor with an interactive drawing tablet. It is a perfect tool for use in lessons, lectures and presentations. Bright, bold annotations can be created with a wireless pen over any computer or IT software based point and click applications. The Classscreen allows you to easily annotate over pre-prepared lesson slides and then allows you to capture the annotations and diagrams you create on screen by saving them as computer files for use in another lesson or revision session. The Classscreen is visible in both dark and bright sunny conditions and the image on the screen can be projected via a projector to a pull down screen or Interactive White board, which works extremely well in school halls and large rooms

RF Slate: The RF Slate is a graphic tablet which is used to communicate with an Interactive Whiteboard or computer through a wireless RF interface that plugs into any USB port on the computer. It allows you to navigate your way through files lesson plans and content while moving around the classroom. It has all the functions of a full sized interactive whiteboard. As it is wireless, it can be passed around the classroom for the students to navigate to their work, add notes or annotate over resources. Teachers no longer need to stay rooted to one place - behind a lectern or in front of the class.

Interactive Response System: **Class Comm:** Our new and improved Interactive Response system is launching, taking learning into the 21st century. ClassComm allows participants to use their own personalized memory card to give answers in a variety of ways, enabling the presenter to truly canvas the views of the audience. The ClassComm software means presenters can spontaneously create questions during a session, or even prepare a structured layout for the audience which can be used time and time again. Answers can then be transferred, collected and analyzed for future reference, so the participants have a permanent record of their results and feedback, which can be accessed at any time. ClassComm works with any application and is now Vista compatible, meaning the full testing feature can run with any laptop, projector or pc

Optoma Projectors: Optoma Projectors capable of projecting in any assembly hall or lecture theatre. They can light up any presentation with a razor sharp
