WEIR GATES MANUFACTURER Weir Gate is used for flow control in various applications where water flows over the slide, Jash Engineering India Limited Is a manufacturer of various types of WEIR GATES like CAST IRON WEIR GATES & ALUMINUM WEIR GATES: These Weir gates are bottom opening type of control gates and can be used either for decantation process in a a reservoir ,tank and also for maintaining Specific level of fluid control in a reservoir or a tank. STAINLESS STEEL WEIR GATES : These weir gates are fixed in between two parallel side walls of an open channel and are used to isolate flow within as well as in and out of an open channel. These weir gates are suitable for seating as well as unseating water head but the height of water in both cases should be less than height of shutter. HIGH DENSITY POLYETHELENE [HDPE] WEIR GATES FIBRE REINFORCED PLASTIC [FRP] WEIR GATES OPTIONAL FEATURES AVAILABL WITH THE WEIR GATES ARE • Metal to rubber sealing arrangement.
• Mechanical or chemical anchor fasteners.
• Wall thimble mounting.
• Self Contained gate with lift mechanism mounted directly on gate frame.
• Stem cover either made of galvanized steel or transparent tube.
• Gate opening indicating arrangement.
• Non rising spindle.
• Electrically operated lift mechanism with manual override facility.
• Pneumatically operated lift mechanism with manual override facility.
• Portable electric / hydraulic operator for manually operated gates.
