Fabricated Valves

, Madhya Pradesh
India

We are manufacturer and supplier for fabricated valves used as water control valve and water control system devices for various flow control operated of fluids and waste water with the use of our fabricated valves .The various series of fabricated valves are are developed for custom built odd sizes isolation fabricated valve requirement. Expanding a versatile product offering for water control fabricated valves, JASH offers fabricated slide valve fabricated and knife gate valves for special requirement of water flow control. The Series of valves include slide gate valves, metal to metal, and resilient seated knife gate valves. The fabricated valves that are manufactured by us are used for heavy duty industrial water which are maintenance free and economical. Various Operating Options of the fabricated valves Manual fabricated valves Chain wheel fabricated valves Electro pneumatic fabricated valves Electro motor fabricated valves These valves can be configured with various metallurgy, connection types, sizes, pressure ratings, face-to-face dimensions, and actuators and is sturdy in operation can operated under rough condition with low maintenance of the fabricated valves.

The fabricated valves that we manufacturer have wide industrial vale application is various industries like chemicals, oil, pharmaceuticals, food, or pulp and paper. Sizes Available : Custom built upto 2500 x 2500 Square or similar rectangular size.

Flange Hole Details : Flange Hole drilling options can be Custom built Suitable Operating temprature of fabricated valves are -20°C to 800°C We manufacture and Supply Fabricated Valves series check valve Water Control System Valves Water control fabricated Valve Fabricated Butterfly Valves Fabricated Check Valve Large Fabricated Valves
