

# Engineering Machining workshop India

Indore, Madhya Pradesh 452001  
India

With a high end infrasture and mahines backed with highly skilled experianced technical staff all jobs are done and is backed with suitable guarantee of performance. We are pioneer in developing and using number of the state of the Art technologies and processes like metal sintering at cryogenic temperature (Sub Zero Degree Centigrade) for restoration of Dimensions to provide and special surface properties using State of the Art Arconomic® system. In this system the designing of repair is done with a systematic and scientific approach.

**RECIPROCATING ASSEMBLIES REPAIR** We undertake repair, rebuilding and refurbishing of component is Heavy Engineering machines like **CROSS HEADS** : Repair and rebuilding of cross heads **CYLINDER** : Cylinder repair, Cylinder rebuilding and refurbishing of cylinders used as component of various reciprocating assemblies. **GUDGEON PIN** : Repair of Gudgeon pins **PISTON ROD** : Piston Rods repair, Piston Rods Supplier & Piston Rods manufacturer **CONNECTING RODS** : Repair Connecting Rods, Rebuilding Connecting Rods **Plunger** : Plunger Manufacturer, Plunger repair, Electroplating and chrome plating of plungers

The wear compensation is done by Arconomic® sintering on worn out area/Journal / Seat at Cryogenic temperature with uniform hardness and high surface finish. This type of rebuilding rules out physical distortion and metallurgical changes generally associated with conventional rebuilding process. It maintains designed strength of components With a proven track record of over four decades **CENTRIFUGAL ASSEMBLIES REPAIR** **CENTRIFUGAL PUMP** :

We are centrifugal pump assembly manufacturer and also undertake turnkey jobwork for centrigrugal pump asseby repair. **SCREW COMPRESSOR** : We repair screw compressor at our workshop **TURBINE REPAIR** : we undertake turbine repair worked back by performace gurantee **GEAR BOX** : Repair and rebuiding of gear box for various enginnering machines **ROTOR SHAFT**: Repair turbine rotor shaft and rebuilding rotor shaft, we are also manufacturer of turbine rotor shaft **ROTORS** : Rotor repair works and rotor rebuilding job work are performed with high precision at our engineering workshop **IMPELLER** : Impeller Repair and impeller shaft repair work, we also manufacturer impeller and supplier of impellers in india

We are one of the leading engineering worshop and reclaimers of sophisticated engineering components of HEMM, locomotive, Turbine assembly, Pumps, Compressors, Gear Boxes, D. G. Sets, process plant and machinery. **HIGH PRESSURE ASSEMBLIES** Following High

Pressure Assemblies are repaired manifold repair  
valve block rebuild and valve block repair

Cylinder repair

Repair of engine block

# Engineering Machining workshop India

---

repair of locomotive engine

repair of dozer engine,

Generator engine overhaul

HEMM engine repair.

We are serving clients from various background industries from government and private sector Chemicals, Railways, Petrochemicals, Fertilizers, Cement, Power, Mining, Steel, Sugar, etc for sophisticated repairs, design and development, Import substitution CONTACT US FOR ALL REPAIR AND REBUILDING JOB WORK FOR VERIOUS HEAVY ENGINEERING COMPONENTS
